To whom it may concern

08 July 2021

Dear Sir or Madam,

Les Quennevais School complete in July 2020 amidst the pandemic. It was officially opened on the 25 June 2021 by the Princess Royal.

LabFX took part in a competitive tender process that was controlled by Jersey Property Holdings (JPH) and not the main contractor.

Following a visit to the LabFX factory on Hull, they were awarded the contract for the fitted furniture in the 11,000m² new secondary school.

This project was a very prestigious building and high-profile development for the public of the Island of Jersey.

From the moment we engaged with LabFX, throughout the initial design phases to the completed installed product, has been a pleasant and professional experience.

LabFX worked very closely with the JPH architectural team, FF&E Partner and School to agree the specifications/colours for the significant amount of bespoke fitted furniture.

LabFX were able to work in 3D Revit (AutoCad) to produce visual that the school could understand and visualise. All subject areas were covered from Science to Food to Textiles.

Their assistance with the coordination of the services was crucial to the success.

Their professionalism, approach, general helpfulness and overall communication, from key members of the LabFX team, throughout all stages of our engagement on this project, has been exemplary. To the extent that we were very happy to award a second project on the island to them.

For the Les Quennevais project, the quality of their finished installed product was excellent. We would happily recommend LabFX.

Yours sincerely,

A handwritten signature in black ink that reads "Richard Cheal".
